

St Paul's Church of England Primary School Oswaldtwistle

‘Don’t let anyone look down on you because you are young but set an example for the believers in speech; in conduct; in love; in faith and in purity’ (1 Timothy 4:12).

Intimate Care Policy

September 2023

Agreed by Governors:

‘Working, learning, playing and worshipping together’

The pastoral care of our children is central to the aims, ethos, school vision and teaching programmes in at St Paul's Primary School and we are committed to developing positive and caring attitudes in our children. Our Intimate Care Policy is part of our collective pastoral care policies. This policy is in line with multi-agency guidance as found in the Area Child Protection Committees' (ACPC) Regional Policy and Procedures (2005). It is our intention to develop independence in each child, however there will be occasions when help is required.

The principles and procedures apply to everyone involved in the intimate care of children. 'Intimate care may be defined as an activity required to meet the personal care needs of each individual child in partnership with the parent, carer and the child.' (9.26, ACPC Regional Policy and Procedures). In school this may occur on a regular basis or during a one-off incident.

St Paul's Church of England Primary School is committed to ensuring that all staff responsible for the intimate care of children will undertake their duties in a professional manner at all times. We recognise that there is a need to treat all our children with respect when intimate care is given. No child should be attended to in a way that causes distress or pain and adults and staff must be sensitive to each child's individual needs.

Intimate care is any care which involves one of the following:

- Assisting a child to change his/her clothes
- Changing or washing a child who has soiled him / herself
- Assisting with toileting issues
- Supervising a child involved in intimate self-care
- Providing first aid assistance
- Providing comfort to an upset or distressed child
- Feeding a child
- Providing oral care to a child
- Assisting a child who requires a specific medical procedure and who is not able to carry this out unaided. (In the case of a specific procedure only a person suitably trained and assessed as competent should undertake the procedure, {e.g. the administration of rectal diazepam})

Parents have the responsibility to advise the school of any known intimate care needs relating to their child.

Principles of Intimate Care

The following are the fundamental principles of intimate care upon which our policy guidelines are based:

- Every child has a right to be safe
- Every child has the right to personal privacy
- Every child has the right to be valued as an individual
- Every child has the right to be treated with dignity and respect
- All children have the right to be involved and consulted in their own intimate care to the best of their abilities

- All children have the right to express their views on their own intimate care and to have their views taken into account
- Every child has the right to have intimate care that is appropriate and consistent

Assisting a child to change his / her clothes.

This is more common in our Foundation Stage. On occasions an individual child may require some assistance with changing if, for example, he/she has an accident at the toilet, gets wet outside, or has vomit on his/her clothes etc. Staff will always encourage children to attempt undressing and dressing unaided. However, if assistance is required this will be given.

Staff will always ensure that they have a colleague in attendance when supporting dressing/undressing and will always give the child the opportunity to change in private, unless the child is in such distress that it is not possible to do so. If staff are concerned in anyway parents will be sent for and asked to assist their child and informed if the child becomes distressed.

Changing a child who has soiled him/herself

The school has an adult accessible toilet and a child accessible toilet suitable for wheelchair users. If a child soils him/herself in school a professional judgement has to be made whether it is appropriate to change the child in school, or request the parent/carer to collect the child for changing. In either circumstance the child's needs are paramount and he/she should be comforted and reassured throughout.

The following guidelines outline our procedures but we will also seek to make age-appropriate responses:

- The child will be given the opportunity to change his / her underwear in private and carry out this process themselves
- Parents/carers will provide a supply of wipes, clean underwear and spare uniform if this is a regular occurrence
- If a child is not able to complete this task unaided, school staff will attempt to contact the emergency contact to inform them of the situation
- If the emergency contact can come to school within an appropriate time frame, the child will be accompanied and supported by a staff member until they arrive. This avoids any further distress and preserves dignity
- If the emergency contact cannot attend, school will seek verbal permission for staff to change the child. If none of the contacts can be reached the Foundation Stage Leader will be consulted and a decision taken on the basis of loco-parentis and our duty of care to meet the needs of the child
- Ensure that the action you are taking is necessary. Get verbal agreement to proceed – CARE – CONCERN – COMMUNICATE
- Ensure the child is happy with who is changing him/her
- Be responsive to any distress shown
- Always wear protective disposable gloves
- Seal any soiled clothing in a plastic bag for return to parents/carers

In the case of Foundation Stage children and in particular an infant child, in order to avoid any unnecessary distress, a member of staff may assist the child, with a colleague in attendance, unless a parent has requested otherwise or if the child is reluctant. Parents will be contacted as soon as it is practical to do so.

Providing comfort or support to a child

There are situations and circumstances where children seek physical comfort from staff (particularly children in Early Years). Where this happens, staff need to be aware that any physical contact must be kept to a minimum. When comforting a child or giving reassurance, staff must ensure that at no time can the act be considered intimate. If physical contact is deemed to be appropriate, staff must provide care which is professionally appropriate to the age and context. If a child touches a member of staff in a way that makes him/her feel uncomfortable this can be gently but firmly discouraged in a way which communicates that the touch, rather than the child, is unacceptable. If a child touches a member of staff, as noted above, this should be discussed, in confidence with the Designated Senior Leader for Safeguarding.

Assisting a child requiring a specific medical procedure and who is not able to carry this out unaided

Our Supporting Children with Medical Conditions/Medicine in School Policy outlines arrangements for the management of the majority of medications in school. Parental permission must be given before any medication is dispensed in school - this form is available in the office. A small number of children will have significant medical needs and in addition to the arrangements included in our Medicines in School Policy, they will have an Individual Care Plan. This Care Plan will be formulated by the relevant medical body. If required, school staff will receive appropriate training.

Swimming

Key Stage Two children participate in a swimming programme at Hyndburn Leisure Centre. Children are entitled to respect and privacy when changing their clothes however, there must be the required level of supervision to safeguard young people with regard to health and safety considerations and to ensure that bullying, teasing or other unacceptable behaviour does not occur. Where a child needs additional support for changing, parent/carer permission will be sought and a personal care plan will be drawn up so as to maintain dignity but increase independence.

Residential Trips

Residential educational visits are an important part of any child's experience. Particular care is required when supervising pupils in this less formal setting. As with Extra-Curricular Activities, although more informal relationships in such circumstances tend to be usual, staff are still guided by our Safeguarding & Child Protection procedures, and Positive Relationships & Behaviour Policies. Some specific Intimate Care issues may arise in a Residential context. Showering Children are entitled to respect and privacy when changing their clothes or taking a shower. However, there must be the required level of supervision to safeguard young people with regard to health and safety considerations, and to ensure that bullying, teasing or other unacceptable behaviour does not occur. This means that staff should announce their intention of entering changing rooms, avoid remaining in changing rooms unless pupil needs

require it, avoid any physical contact when children are in a state of undress and avoid any visually intrusive behaviour. Given the vulnerabilities of the situation, it is strongly recommended that when supervising children in a state of undress, another member of staff is present. However, this may not always be possible and therefore staff need to be vigilant about their own conduct, e.g. adults must not change in the same place as children or shower with children. It is best practice in our school that when an incident has taken place that has necessitated a member of staff to be present when children are changing that an incident report is made.

School Responsibilities

All members of staff working with children are vetted. This includes students on work placement and volunteers who may be left alone with children. Vetting includes criminal record checks and two references for staff. Only those members of staff who are familiar with the Intimate Care Policy and the other policies/guidance in the school's Safeguarding Suite are involved in the intimate care of children.

Where anticipated, intimate care arrangements are agreed between the school and parents and, when appropriate and possible, by the child. When changing a child we ensure there are two members of staff present or in in very close proximity. If there is regular changing of children consent will have been given by parents. Only in emergencies would staff undertake any aspect of intimate care that has not been agreed by parents and school. Parents would then be contacted immediately. The views of all relevant parties should be sought and considered to inform future arrangements.

If a staff member has concerns about a colleague's intimate care practice he or she must report this to the Designated Senior Leader and/or follow guidance in the Whistleblowing Policy.

For Good Practice

All children have the right to be safe and to be treated with dignity and respect. These guidelines are designed to safeguard children and staff. They apply to every member of staff involved with the intimate care of children. Young children and children with special educational needs can be especially vulnerable. Staff involved with their intimate care need to be particularly sensitive to their individual needs. Members of staff also need to be aware that some adults may use intimate care as an opportunity to abuse children. It is important to bear in mind that some forms of assistance can be open to misinterpretation. Adhering to the following guidelines of good practice should safeguard both children and staff:

- Involve the child in the intimate care. Try to encourage a child's independence as far as possible in his / her intimate care. Where a situation renders a child fully dependent, talk about what is going to be done and, where possible, give choices. Check your practice by asking the child or parent about any preferences while carrying out the intimate care.
- Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation. Intimate care should not be carried out by a member of staff working alone with a child.
- Make sure practice in intimate care is consistent; a child may have multiple carers so a consistent approach to care is essential. Effective communication between all parties ensures that practice is consistent.

- Be aware of your own limitations. Only carry out activities you understand and feel competent with. If in doubt, ask. Some procedures must only be carried out by members of staff who have been formally trained and assessed.
- Promote positive self-esteem and body image. Confident, self-assured children who feel their bodies belong to them are less vulnerable to sexual abuse. The approach you take to intimate care can convey lots of messages to a child about their body worth. Your attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be both efficient and relaxed.
- If you have any concerns you must report them. If you observe any unusual markings, discolouration or swelling report it immediately to the Designated Senior Leader. If a child is accidentally hurt during intimate care or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to the DSL. Report and record any unusual emotional or behavioural response by the child. A written record of concerns must be made available to parents and kept in the child's personal file.

Working with Children of the Opposite Sex

There is positive value in both male and female staff being involved with children. Ideally, every child should have the choice for intimate care but the current ratio of female to male staff means that assistance will more often be given by female staff. The intimate care of boys and girls can be carried out by a member of staff of the opposite sex with the following provisions:

- When intimate care is being carried out, all children have the right to dignity and privacy, i.e. they should be appropriately covered, the door closed or screens/curtains put in place
- If the child appears distressed or uncomfortable when personal tasks are being carried out, the care should stop immediately. Try to ascertain why the child is distressed and provide reassurance
- Report any concerns to the DSL and make a written record
- Parents must be informed about any concerns.

Communication with Children

It is the responsibility of all staff caring for a child to ensure that they are aware of the child's method and level of communication. Depending on their maturity and levels of stress children may communicate using different methods - words, signs, symbols, body movements, eye pointing, etc. To ensure effective communication:

- Make eye contact at the child's level
- Use simple language and repeat if necessary
- Wait for response
- Continue to explain to the child what is happening even if there is no response
- Treat the child as an individual with dignity and respect
